

**Tennessee Department of Environment and Conservation
Tennessee Department of Transportation
Region IV Environmental Protection Agency**

**Environmental Affairs Committee
(Management)**

- Establishes policies
- Enforces regulation and policies
- Identify program problems and solutions
- Establish waste minimization program
- Ensures hazardous chemical and radioactive waste is being packaged, transported, and disposed in accordance with applicable regulations

***Hazardous Waste
Program Management***

Large Quantity Generator and
Hazardous Materials Transporter
Permits

**Hazardous Materials Officer
(Enforcement)**

- Manages hazardous waste program
- Identifies waste problems
- Initiates corrective actions
- Verifies implementation of corrective actions
- Maintains all necessary permits
- Ensures safe and environmentally-sound handling, packaging, and disposal of chemical and radioactive waste

Hazardous Waste (Operations)
Cradle to grave control of hazardous waste

Chemical waste collection	Radioactive waste collection
Proper storage of incompatibles	Bulking flammable solvent waste
Chemical database management	Chemical shipment coordination
Sign generator manifests	Hazardous materials transportation
Solid RAM waste packaging	Liquid scintillation vial packaging
Bulking radioactive liquids	Decay storage of RAM waste
Shipment of RAM waste	Radiation portal monitor response
Lab close-out management	RCRA training
DOT Training	Chemical spill response
RAM spill response	Decommissioning & Decontamination
Coordination of high hazard chemical neutralization
