

Use one sheet for each new radioactive material (RAM) room. Include rooms used for storage of RAM. If a RAM room is shared among two or more investigators who are approved for radioisotope use, list all of them. Return to: Vanderbilt Environmental Health & Safety, U-0202 MCN 2665.

1. Principal Investigator _____ Phone # _____

Building & Room # _____ When is the room needed? _____

Who can be contacted if necessary? _____ Phone # _____

2. Briefly describe the main use of the room (counting/instrument room, radioactive storage, main prep. room, etc.), indicate if this is a cold room, and list any other investigators (who use radioisotopes) who share this room.

3. Isotopes & Amounts Used In This Room

Isotopes	Typical Use		Major Preps	
	Amounts Used (μCi)	Frequency (daily, weekly, monthly)	Amounts Used (μCi)	Frequency (daily, weekly, monthly)

4. Provide a sketch of the room on the reverse side and label as indicated below:

Sinks used for RAM	RS
RAM benches	RB
RAM hoods	RH
RAM centrifuges	RC
RAM incubators	RI
RAM waste	RW

Refrigerators used for RAM storage	RR
Freezers used for RAM storage	RF
Refrigerator/Freezers used for RAM storage	RR/RF
Anything else which can become contaminated with RAM, prefix with:	R
Cross-hatch any areas in which radioactive materials are <i>not</i> permitted.
